

5 O'CLOCK SPECIAL.

PRICE ONE CENT.

ARE THEY AMATEURS?

Status of the Players in the Great Football Match.

Does That M. A. C. Contract Make Them Professionals?

The Total Receipts of the Game Placed at \$50,000.

Each Association's Share Estimated at More than \$16,000.

Considerable comment was made by amateur athletes and others this morning regarding the contract between the Manhattan Athletic Club and the Princeton football players.

It was said that the contract was a purely business one, made by the business men of the Manhattan Athletic Club for the purpose of improving their property, and by the business men of the College Association to swell their funds.

The question is not whether an amateur association can receive admission fees to its sports, but whether the fact that the Manhattan Athletic Club having obtained control of the football exhibition, assuming the expense and contracting to pay a certain percentage of the receipts to Princeton and Yale for exhibiting on its (the Manhattan's) field, does not put the exhibiting teams in the light of ordinary professionals.

It was pointed out that the contract was a purely business one, made by the business men of the Manhattan Athletic Club for the purpose of improving their property, and by the business men of the College Association to swell their funds.

Some one spoke of the similarity of the game, so far as its business arrangements were concerned, to the boxing exhibitions participated in by professional pugilists at the Granite, Puritan and other associations for the promotion of the manly art and for profit.

All of the bicyclists, pedestrians and pugilists who participated in the exhibitions referred to, it was said, are of necessity professionals, because they shared in the profits of the show.

How much more then, was asked, should the rule apply to college athletes who receive greater compensation for their exhibition of strength and skill?

The football eleven, consisting of amateur athletes, played two hours and seven minutes yesterday, and their college athletic associations will receive more than \$16,000 each, according to the business arrangement they made with the Manhattan Athletic Club.

Martin, the professional bicyclist, rode almost continuously for six days and nights at the Madison square garden and received a little more than \$1,000 for his exhibition.

Among those who commented on the business character of the enterprise were some with old-fashioned ideas regarding college athletes.

They said that the time was when college athletes were content with victory and thought less of dollars; when they were willing to contest for supremacy for glory alone, and did not stipulate that the meeting should be in a city of 2,000,000 inhabitants, where 50,000 or more persons could witness the game by paying for their seats.

They deplored very much the commercial character which college athletics have assumed of recent years.

THOMAS STORM SMILES.

Ex-Alderman Walter Storm, Treasurer of the Manhattan Athletic Club, was of these.

THE EVENING WORLD reporter saw him at the club-house in Madison avenue this morning. He was almost elbow deep in greenbacks, and receipts of yesterday's exhibition.

He said that he did not know how much money had been taken in, but was trying to find out. He is assistant treasurer and it was more than \$45,000.

Of this 75 per cent., he said, goes in equal shares to the Yale and Princeton Athletic Associations and 25 per cent. to the Manhattan Athletic Club.

Our share will not be enough to pay our expenses," said he. "It cost us more than \$10,000 to erect stands, but these will be a permanent improvement, and if we get the game next year, as we hope to, we will make some money."

Treasurer Storm smiled at the suggestion that the playing of the football teams under the arrangement with the club had made the players professionals.

"Certainly, they are not professionals," said he. "Not one individual received a penny. It all went to the athletic associations of their colleges."

It is covered into a general fund, which is expended for training, paraphernalia, etc., not only for the football teams, but for rowing and all sorts of athletic sports.

"These college associations are on the same footing as other amateur athletic clubs. We all receive an admission fee to our games and the receipts go to pay expenses, and any surplus is converted into the general fund."

"Contented don't get a cent and are not tainted with professionalism. Nor are the players of the Yale and Princeton elevens."

Besides the money which was received by the managing club for admissions at the regular price, ticket speculators are said to have made from \$15,000 to \$25,000.

Mr. Storm said this morning that he thought the speculators' profits did not exceed \$10,000.

He said he did not know how the speculators profited themselves or so many tickets, but that he thinks they must have hired an

army of men and boys to procure them for them.

HARDING SAYS THEY'RE PROFESSIONALS.

William S. Harding, of the Police Gazette, says:

"An amateur athlete is one who does not enter into public or private competition for a stake, admission money or entrance fee."

"I never considered the Yale and Princeton football players as amateurs anyway. They play for honor and the money that can be made out of the game, and by so doing make themselves professionals."

"I held an athletic exhibition some time ago. Bonafide amateurs, if there are any, competed. They did not compete with professionals, but among themselves."

"They were afterwards protested because they had taken part in games where an entrance fee was charged."

"It may be argued that because the individual members of the team do not receive actual money for their work that their case is different. They are members of the association, which does receive the money, and consequently they are as deep in the mud as the association is in the mire."

W. B. CURTIS TAKES A DIFFERENT VIEW.

W. B. Curtis, of the Board of Governors of the Amateur Athletic Union of the United States, says:

"I do not think there is any question about the matter at all. The players do not receive any money—not a cent. The football association to which the teams belong receive all the money and it is laid out in perfecting and aiding the sport. They simply rent the grounds and use them."

"The football game yesterday was no more professional than the games of the Manhattan Athletic Club and the Yale and Princeton football associations each will receive nearly \$17,000. This is about \$5,000 more than was ever before received by the rival college associations in a Thanksgiving Day game."

The largest receipts previously obtained were realized from the game on last Thanksgiving day, at Eastern Park, when each of the colleges came in for about \$12,000 from the net proceeds.

HOW THE PROCEEDS ARE TO BE DIVIDED.

According to Capt. Cornell, of the Manhattan Athletic Club, the arrangement with the colleges was that each should receive one-third of the gross receipts, and that out of its share the Manhattan Club itself would stand all the expenses of the game. These included the preparation of the grounds and the erection of four additional stands, the labor of superintendence, the printing and sale of tickets, advertising, handling of the money, and the care of the crowd on the day of the game.

What this will amount to the officers of the club say they had not yet able to state definitely, but it is estimated that the expense will foot up several thousand dollars.

When Secretary Hughes was asked yesterday afternoon what the gross receipts would be he said that he did not think they would exceed \$45,000.

He was only asked on an estimate that was made before the game began," he said, "when we calculated that about 30,000 people were on the field."

"I do not attempt to make any definite statement, for the figures cannot be known until all the returns have been made and the money counted. I think that it is not possible to make a complete statement before Saturday evening, when we expect to have the accounts all made up."

WHAT A YALE MAN SAYS.

Efforts were made to find some of the managers of the college football associations after the game, but they had not yet returned, and to hunt any of them in the house of students who roamed about the town last night would have been like searching for a needle in a haystack.

A prominent representative of the Yale football interests said last night at the Fifth Avenue Hotel that while he had no definite money count, he thought that it is not possible to make a complete statement before Saturday evening, when we expect to have the accounts all made up."

However, I may be mistaken," he added, "I suppose the matter will be fixed up satisfactorily, at any rate. All we know is that the money count is not yet made, and that the money from the game than any which has ever been played in the vicinity of New York."

The following record shows the Thanksgiving Day game will remain in the treasury of the Football Association, which is said to be the wealthiest association of its kind in the country.

As Princeton's athletic organizations are said to be the poorest of the kind in the country, giving day game will remain in the treasury of the Football Association, which is said to be the wealthiest association of its kind in the country.

field from the west, which were sold at 50 cents each.

NOT MUCH OF A CROWD ON THE BLUFF.

It was estimated previous to the game that at least 20,000 people could be crowded into the space between the stands and the railings including the field, and that 25,000 more might be accommodated upon the rocky bluff.

These estimates may have been somewhat correct, but nothing like that number of persons availed themselves of either place. The number of those who watched the game from the inner railings could not have exceeded 3,000, for only those in the first two or three rows could see anything of the playing from that point, and the buyers just the space between the railing and the stands was unoccupied.

On the bluff instead of 25,000 spectators there were barely twenty-five hundred, so that from standing room places the management of the big show derived a profit of hardly one cent.

The items going to make up the total source of revenue from the game were therefore as follows:

Grand stand boxes, \$2,000
Grand stand seats, 1,500
Carriage stands, 1,500
Other open stands, 15,000
General admission, standing room, 2,000
Admission to the bluff, 1,500
Total, \$20,500

If this is divided equally between the Manhattan Athletic Club and the Yale and Princeton Football Associations each will receive nearly \$17,000. This is about \$5,000 more than was ever before received by the rival college associations in a Thanksgiving Day game.

The largest receipts previously obtained were realized from the game on last Thanksgiving day, at Eastern Park, when each of the colleges came in for about \$12,000 from the net proceeds.

WALL ST. RACING.

STOCK REPORTS. HEDGE ROSE

Light Trading and a Bearish Feeling at the Opening.

Prices Rallied in Fractions Before the Close.

Field, Lindley & Co.'s Contracts Settled Under the Rules.

WALL STREET, FRIDAY, NOV. 27.—The bears had control of the stock market this morning, notwithstanding the encouraging railway traffic returns of Eastern and Western trunk lines, the prospect that the affairs of the Richmond Terminal company will shortly be arranged on a basis satisfactory to the security holders and a decided improvement in the foreign situation.

The selling was not particularly vigorous, however, and prices yielded only 1/4 to 1 per cent. outside of Chicago gas, which dropped over two points on talk of renewed suits.

Up to noon loss had been 125,000 shares had changed hands.

Among the specialties Manhattan jumped 2 1/2 to 10 1/2, and Richmond Terminal probed broke 5 per cent. to 42, with a subsequent rally to 44.

The 1000s of the stock market trading circles later in the day, and prices rose 1/4 to 1 1/2 per cent. in the general list, and 4 1/2 per cent. in the specialties.

The improvement was due to the statement that the St. Paul net earnings for October would show an increase of \$400,000 over the year.

The following were sold for their account: 4000 Canadian Northern, 500 Erie preferred and 100 Michigan Central.

It is reported from London that the fortnightly settlements have been completed without friction, and money is easy.

The Lake Shore road for the nine months ended Sept. 30, 1901, earned 4 1/2 per cent. on its stock.

The steamship harvest gained \$23,920 in gold to Lauenburg and Co., Hamburg, following the sale of 400,000 shares of the company.

J. & W. Seligman & Co. are advised of the shipment to them of \$300,000 from Europe.

The Chicago & Northwestern and St. Paul & Northern Pacific companies are paying interest due Dec. 1.

The total sales at the New York Stock Exchange today were 4,000,000 shares, of listed stocks and 38,000 ounces of silver.
